

October 1, 2010

Honorable Mayor and City Commissioners:

The City of Gainesville's Capital Improvement Plan (CIP) for fiscal years 2011 to 2015 encompasses projects totaling \$68,802,156 that were funded as part of the FY2011 – FY2015 proposed CIP which was approved by the City Commission during the 2011 budget hearings, as well as projects in progress prior to FY2011 but not yet completed, such as the Traffic Management System project.

Wild Spaces Public Places Half Cent Sales Tax funded projects totaling over \$12 million are not included in this document as funding for all projects was committed during FY2010 and all projects (except for land acquisition) have been started.

This document:

- Outlines the City's infrastructure needs in a section detailing total capital project requests submitted by departments (Funded/Unfunded by Year)
- Specifically identifies projects with funding allocations through FY15 and,
- Identifies the sources of the capital funding.

One of the City's long-term needs has been to identify a recurring funding source for routine facilities maintenance projects and equipment replacement. In addition, the City Commission has emphasized the importance of significantly increasing the resources provided to road maintenance.

This CIP represents the first step in meeting those goals. In FY2015, a debt issue will be retired, which will free up recurring funding in the General Fund. Some of the funds will be used for future debt service on a new capital bond issue, while the remainder is earmarked to start funding on a recurring basis:

- A new internal service fund for equipment replacement (radios, computers, etc.)
- A new internal service fund for facilities maintenance (roofs, repairs, upgrades)
- Significant incremental funding for road maintenance and repairs

Providing adequate infrastructure is a vital element to delivering quality services to our residents. Planning for future infrastructure and capital needs will ensure that the City continues to provide service levels that residents have come to expect. This plan supports those expectations.

Respectfully Submitted,

Russ Blackburn  
City Manager

## FINANCIAL CAPACITY ASSESSMENT

In accordance with the City's Capital Improvement Planning Policy, the Capital Improvement Plan Financing Committee is required to review the financial capacity of the City to fund Capital Improvement Plan (CIP) projects. This assessment should include a review of such issues as

- Capital market conditions
- Current debt levels
- Unfunded liabilities
  - Pension costs
  - Other post employment benefits
- Projected trends in revenues, expenditures & fund balance

### Capital Markets

As shown below current rates are higher on the long end of the yield curve than in previous years, but considerably lower on the short end.

Currently, with yields ranging from .78% at one year to 4.78% at 20 years, the annual cost of debt service on a 20 year issue is approximately \$74,000 per million borrowed, so from a historical standpoint capital is still relatively cheap.

**Current Debt Levels**

The following debt limitations are incorporated in the City’s Debt Management Policy. Absent compelling economic or policy reasons to the contrary:

- Total outstanding debt service (principal & interest) will not exceed 10% of the City’s taxable property value
- Total outstanding debt service (principal & interest) will not exceed \$3,000 per capita based on City population
- Per capita debt (principal only) will not exceed 6% of per capita income
- Annual debt service (principal & interest) will not exceed 15% of budgeted General Fund revenues

Detailed below is how as of September 30, 2009 the City measured against these debt capacity and affordability limitations.

<b>Measure</b>	<b>Limitation</b>	<b>Actual</b>
Outstanding debt service as a % of taxable property value	10%	5.15%
Outstanding debt service per capita	\$3,000	\$2,317
Per capita principal as a % of per capita income	6.00%	5.03%
Annual debt service as a % of budgeted General Fund revenue	15%	10.10%

Finally, the City’s debt service coverage ratio (legally available non ad valorem revenues versus outstanding debt service) remains strong.

**Unfunded liabilities**

The City sponsors two defined benefit pension plans, a disability pension plan, and a retiree health insurance trust fund. As indicated below, all four of these plans are extremely well-funded as of the last actuarial valuations.

With defined benefit pension plan funding ratios between 95% and 100%, and ratios above 100% for the disability retirement plan and retiree health insurance plan, unfunded liabilities for post employment benefits are not presently a financial concern for the City.

**Fund Balance trends**

Outlined below is the trend in General Fund fund balances over the past five years.

	FYE 05	FYE 06	FYE 07	FYE 08	FYE 09
Total fund balance	15,120,868	16,241,614	16,769,560	14,448,820	14,935,460
Unreserved fund balance	7,235,562	7,844,042	8,853,416	8,095,412	10,432,153
Required unreserved fund balance					8,323,215

Total fund balance rose over the period FY05 – FY07, and then fell in FY08 as the City experienced a General Fund deficit of approximately \$2.3M. FY09 pre-audit figures show that hiring and travel freezes along with strict expenditure controls will result in approximately a \$486,000 surplus for FY09.

Budget reductions in excess of \$5M allowed staff to present a balanced FY10 budget, but due to flattening growth in the utility transfer, projected reductions in the City’s taxable property base, and continued reductions in state intergovernmental revenues, a budget deficit of approximately \$6M is projected for FY11. What this means in terms of capital funding is that we cannot expect to derive any significant new capital funding from existing revenue streams given that they will be required to meet existing obligations over the next few years.

## Summary

Acquiring funds through accessing capital markets is still relatively cheap, and the City's debt service coverage ratios are strong and well within policy limits. However, while General Fund fund balances are strong and post-retirement benefit plans are well funded, current revenue streams are fully obligated to meet current obligations.

Significant capital funds are available only from new revenue streams. Over the next five year period covering the FY11 – FY15 Capital Improvement Plan, there exist several potential funding sources which provide somewhat of a barbell approach over the next five years

- Remaining cash from FEMA reimbursements for the storms of 2004. The approximate total of cash on hand and cash to be received in FY10 is \$375,000. This is one-time money and therefore should be utilized on capital projects and will be available to fund projects in FY11.
- Interest earnings in debt service funds. These are interest earnings in debt service funds on deposits made to fund debt service payments. These are one-time funds whose true genesis is capital projects related. The total for these funds is \$200,000 and will be available to fund capital projects in FY11
- In FY14 & FY15 each there is currently projected to be \$750,000 available for capital projects from General Fund appropriations

Therefore for FY11 \$575,000 is available for capital projects. The City Commission has established a policy for funding certain recurring items: playground equipment, boardwalk replacement, median upgrades, and ADA projects totaling \$95,000. This leaves a balance of \$655,000 available for FY11. Historically, we have funded \$150,000 in PC replacement funding and \$100,000 for miscellaneous facilities improvements. If we continue that process, this would leave \$405,000 to distribute for projects in FY11.

The final debt service payment on the 2005 OPEB bond issue will be made in FY14. The General Fund portion of this FY14 payment is \$3,356,512. Freeing up \$3.35M in the FY15 budget could allow the City, if so decided, to address several capital issues. One potential set of alternatives would be to set up long-needed capital replacement funds as well as generating up front dollars to undertake capital projects

- \$750,000 for a facilities maintenance & replacement fund
- \$500,000 for an equipment maintenance & replacement fund, and
- The balance of approximately \$2.1M if utilized for annual debt service on a capital projects bond issue would support a twenty year issue of approximately \$21M given today's yield scales.

Following is a summary of the potential incremental funds available for the FY11 – FY15 Capital Improvement Plan.

<b>INCREMENTAL FUNDS AVAILABLE: FY11 - FY15 CAPITAL IMPROVEMENT PLAN</b>					
	<b>FY11</b>	<b>FY12</b>	<b>FY13</b>	<b>FY14</b>	<b>FY15</b>
<b>POTENTIAL SOURCES</b>					
Debt svc interest earnings	200,000	-	-	-	-
FEMA funds	375,000	-	-	-	-
General Fund appropriations	-	-	-	750,000	750,000
OPEB 2005 payout	-	-	-	-	3,356,000
Total potential sources	575,000	-	-	750,000	4,106,000
<b>POTENTIAL USES</b>					
Medians, Boardwalk, ADA	95,000	-	-	95,000	95,000
Facilities maint./replacement fund	-	-	-	-	750,000
Equipment replacement fund	-	-	-	-	1,000,000
FY15 debt issue	-	-	-	-	1,606,000
Total potential uses	95,000	-	-	95,000	3,451,000
Balance to appropriate	480,000	-	-	655,000	655,000
Bond proceeds from FY15 debt issue	-	-	-	-	21,000,000

Of course the ability to use the funds in this manner would ultimately depend on the City's fiscal position when we reach FY15.
